

# Well Diversified Energy infrastructure

Natural gas supply and demand fundamentals, and the demand for clean energy in North America, have consistently underpinned AltaGas' strategy. As we continue to grow, we are focused on building, owning and operating a diversified portfolio of clean energy assets that reduces our carbon footprint.

~2 Bcf/d of natural gas transacted  
Processing and moving natural gas and natural gas liquids to key markets including Asia

1,688 MW of power generation in four fuel types  
Generating clean energy with natural gas and renewable sources

5 Utilities serving over 570,000 customers  
Delivering clean and affordable natural gas to homes and businesses

~2 Bcf/d of natural gas transacted

1,688 MW of power generation in four fuel types and 20 MW of energy storage

5 Regulated Gas Distribution franchises serving over 570,000 customers

## Our Business

AltaGas is an energy infrastructure business with a focus on natural gas, power and regulated utilities. AltaGas creates value by acquiring, growing and optimizing its energy infrastructure, including a focus on clean energy sources.

## Positioned for Growth

AltaGas has a proven track record of executing and delivering large-scale projects safely, on time, and on budget. As a company, we are positioned to grow by continuing to invest in infrastructure that delivers clean energy to our customers.

## Wellhead to Export Markets

Our Gas segment serves producers in the Western Canadian Sedimentary Basin. We own and operate a significant portfolio of energy infrastructure assets that includes natural gas gathering and processing, natural gas liquids extraction and separation, transmission and logistics, storage, and marketing.

We have a competitive service offering from wellhead to export markets across the energy value chain. Our unique access to international markets creates significant opportunities for AltaGas to meet producer needs for new markets and potentially higher net backs.

## Fueling Clean Energy Demand

Our power assets supply clean electricity to various communities in North America. We have significant construction and operational expertise to continue to grow our generation portfolio. Strategically located assets in British Columbia, Alberta, California, Michigan, North Carolina and Colorado provide significant opportunities to support the shift to cleaner sources of power.

We own and operate highly contracted, long-life power assets across North America. Our power generation is diversified across four fuel sources, including gas-fired, wind, biomass, and hydro assets. All of our power generation capacity comes from clean energy sources.

## Solid Rate Base Growth

We deliver clean and affordable energy to end-users in Canada and the United States. Our utilities are operated by knowledgeable teams with strong regulatory expertise. Our natural gas distribution utilities serve more than 570,000 customers across Canada and the United States Our Utilities segment includes AltaGas Utilities Inc. in Alberta, Pacific Northern Gas in British Columbia, Heritage Gas Ltd. in Nova Scotia, SEMCO Energy Gas Company in Michigan and ENSTAR Natural Gas Company in Alaska.

AltaGas moves ahead with final investment decision on Canada's first propane export terminal off the west coast of Canada.

## Community

Creating benefits in communities where we operate is a big part of our company and our beliefs. AltaGas' 1,700 employees support their communities in our operating areas by contributing to local causes through donations, sponsorships, and volunteerism.

## Safety and Environment

Safety and Environmental Stewardship are core values at AltaGas and integral to how we operate. The safety of our employees, contractors, and anyone impacted by our operations in addition to protecting the environment and minimizing our impact are critical to AltaGas maintaining a sustainable business that provides for our stakeholders today and well into the future.
