Readers are advised to refer to AltaGas' news release regarding the acquisition of WGL for a further description of the assumptions underpinning the financial outlook information contained in this presentation relating to the combination of AltaGas and WGL. Readers are cautioned that such financial outlook information contained in this presentation should not be used for purposes other than for which it is disclosed herein.

In this presentation we use certain supplementary measures, including Normalized EBITDA, Normalized Funds from Operations ("FFO"), AFFO and net debt that do not have any standardized meaning as prescribed under U.S. generally accepted accounting principles ("GAAP") and, therefore, are considered non-GAAP measures. AltaGas' method of calculating these non-GAAP measures may differ from the methods used by other issuers. Readers are advised to refer to AltaGas' Management's Discussion and Analysis ("MD&A") as at and for the nine months ended September 30, 2017 for a description of the manner in which AltaGas calculates such non-GAAP measures and for a reconciliation to the nearest GAAP financial measure. In this presentation we also use the Non-GAAP measure "Earnings Before Interest and Taxes (EBIT)", which is disclosed in respect of WGL's business segments only. As described in WGL's annual report on Form 10-K filed with the SEC, WGL considers EBIT to be a performance measure that includes operating income, other income (expense), earnings from unconsolidated affiliates and is reduced by amounts attributable to non-controlling interests. EBIT is used in assessing the results of each segment's operations.

Readers are also cautioned that these non-GAAP measures should not be considered as alternatives to other measures of financial performance calculated in accordance with GAAP.
