Purpose

The intent of this approach is to align to the overarching EHS Policy and to further articulate our commitment to operating in a more sustainable and responsible manner.

AltaGas is committed to responsible treatment of the land and species impacted by our operations. This framework emphasizes our commitment to manage our land use in a responsible manner and abide by applicable biodiversity, natural resources, and land-use laws, regulations and permit requirements.

Scope

The Company's commitment to biodiversity and responsible land usage applies to all persons involved in the Company's operations including, but not limited to, Company employees, officers, directors, contractors, and consultants. Our commitment to biodiversity and responsible land use also extends to our value chain, and we use our relationships with our contractors, suppliers, and other business partners to encourage and promote the principles of this approach.

OUR APPROACH

AltaGas strives to:

- Work with our stakeholders, including biodiversity and land management agencies, government, regulators, local communities including local Indigenous communities, experts, non-governmental organizations, and other businesses to consider biodiversity and land impacts of our projects;
- To the extent practicable, design projects that utilize previously disturbed areas, existing footprint and avoid areas with high biodiversity;
- Where applicable, measure and report on our initiatives related to biodiversity preservation, and the biodiversity and habitat risks and opportunities where we operate;
- Where applicable, implement innovative approaches to biodiversity and habitat preservation and rehabilitation, and remain committed to continuous improvement in our biodiversity programs; and
- Protect threatened and endangered species of plants and animals, abiding by the letter and spirit of applicable laws, regulations and permits related to biodiversity and land use.
